

**Issue 1, March**

- 1 Unusual occlusal morphology of mandibular first permanent molar: A case report**  
Sapna Hegde and Ullal Ananda Nayak
- 7 Effect of chemical irrigants and medicaments for endodontic treatment on dentin bonding**  
Yasutaka Sasafuchi, Toru Nikaido, and Junji Tagami
- 13 Periodontal considerations in implant therapy**  
Yi-Pin Tsao and Hom-Lay Wang

**Issue 2, June**

- 31 Augmentation prosthesis fabricated with the use of a soft denture reliner as a functional impression material: A clinical report**  
Naomi Tanoue, Shuichi Mori, and Hideo Matsumura
- 36 Effect of adhesive liner on the shear bond strength of indirect restoration to enamel and dentin**  
Yasushi Shimada, Vanthana Sattabanasuk, Ayano Ishikawa, Chieko Imamiya, Michael F. Burrow, and Junji Tagami
- 45 Individualized reconstruction of major mandibular defect based on craniomaxillofacial relationship**  
Liqun Xu and Chenping Zhang
- 53 Effect of topical application of fluoride gel on artificial secondary caries inhibition**  
Shigemitsu Toba, Patricia N. R. Pereira, Toru Nikaido, and Junji Tagami

**Issue 3, September**

- 62 A resin coating technique to achieve minimal intervention in indirect resin composites: A clinical report**  
Toru Nikaido, Akira Yoda, Richard M. Foxton, and Junji Tagami
- 69 Head and neck manifestations of neurofibromatosis: A clinical report**  
Nadeem Ahmad, Bushra Ahmad, and Hom-Lay Wang
- 76 Evaluation of maxillary protrusion malocclusion treatment effects with prosth-orthodontic method in old adults**  
Peicheng Xu and Honghu Liu
- 82 *In vitro* wear rates of tooth-colored direct restoratives**  
Koichi Shinkai, Shiro Suzuki, and Yoshiroh Katoh
- 91 The experimental study of cryopreserved osteoblasts combined with bioactive glass repairing mandibular defects in rabbits**  
Wanye Tan, Fengcai Wei, Shanzhen Sun, and Mingxia Sun

**Issue 4, December**

- 100 Clinical performance of a premolar jacket crown made of a highly loaded indirect composite and seated with an adhesive luting agent: A clinical report**  
Hideaki Shiono and Hiroyasu Koizumi
- 105 The study on the acoustic features of congenital velopharyngeal insufficiency**  
Liyong Yu, Guomin Wang, Yang Chen, and Yilai Wu
- 111 Finite element analysis of the stress variations on the root canal wall of pulpless tooth by different root canal preparations**  
Jin Hong, Wenwei Xia, Yaqin Zhu, Xiaoyi Wang, and Huanguo Xiong
- 115 Epidemic investigation on permanent tooth caries in 15-year age children in Anhui Province, P. R. China**  
Yuchun Yan, Yong Jiang, Xiaolan Han, and Li Zhang
- 118 Reliability of two methods on measuring root canal curvature**  
Ya-qin Zhu, Ying-xin Gu, Rong Du, and Chen Li
- 122 Effect of glass ionomer cements on nanohardness of caries-affected dentin**  
Chaiwat Maneenut, Toru Nikaido, Richard M. Foxton, and Junji Tagami
